## Delivery contents

Spindles in the UHS series are basically available as a complete system. Items included in delivery are:

- Spindle
- Frequency converter (including motor throttle if needed)
- Lubrication system
- Cable (spindle - frequency converter), supply line
- Hose lines for oil-air lubrication

## Frequency converter

Minimizes heating of high-rotational synchronous motors in the UHS series, which are only allowed for limited over-temperatures due to the low rotor volumes (also suitable for asynchronous motors). The required operating parameters are pre-programmed.

## Lubrication system

The electronically controlled PRELUB lubrication unit is optimally adapted to the oil-air lubricated GMN spindles and guarantees a long service life.

## Cable and hose device

Each 5 meters long.

Also options with special lengths. Please request.

## Accessories

## Cooling system

GMN cooling units ensure precisely adjustable temperature and quantity delivery of the coolant and achieve consistently low operating temperatures.
